NOTED _____

Dear Jim:

Pursuant to our telephone conversation of last week, it is my understanding that inventors Decker and Sprinkel have not yet fully designed the Substitute Smoking Device using pressurized gas or liquid fuel (PM-1311). In any event, the Invention Record for the case does not provide sufficient information to prepare an application. In particular, more detailed descriptions of the ignition switch mechanism and the valve assembly will be required.

I have docketed this case for reevaluation in three months if more detailed information has not come to hand. Please let me know of any further developments in this case. My direct dial extension is 0734.

Sincerely

Christopher P. Godziela
Law Clerk
